Confidential case document prepared from recorded incident, conversation, and evidence data. AI-derived observations are included as stored and should be reviewed by an authorized human before legal filing.

Incident Summary

Incident ID	78cd2322-b36f-4c71-8740-4d57cbbcaa1a
Title	Attempted poisoning by mother-in-law
Status	OPEN
Source	WHATSAPP
Category	PHYSICAL_ABUSE
Severity	CRITICAL
Urgency	IMMEDIATE
Needs Human Review	Yes
AI Generated	Yes
AI Confidence	0
Created At	03/06/2026, 23:55:10
Updated At	04/06/2026, 00:20:50

Summary

The care seeker reported that her mother-in-law secretly tried to pour poison into her tea around 6:00 PM today.

Detailed Description

The care seeker initially reported being treated like a servant by her mother-in-law when her husband is away. In the latest message, she reported a highly traumatizing event where her mother-in-law secretly attempted to pour poison into her tea at approximately 6:00 PM today, which the care seeker noticed.

Case Note

The situation has escalated from emotional abuse/forced labor to an active, life-threatening physical attempt (poisoning). Immediate safety assessment and human intervention are required.

I am so sorry you are going through this. It sounds very exhausting and unfair to be treated this way. To help me understand how we can best support you, could you tell me if she also threatens you or uses physical force when your husband is not around?

I am so incredibly glad you noticed and are safe right now. This is extremely serious and dangerous. Are you in a safe place right now where you can continue messaging me, or do you need help contacting emergency services?

Message Text

Overview: An image was uploaded, but the AI system could not reliably analyze visible injury indicators from it. The care seeker should be asked to describe what happened, whether they are safe, and whether they need medical attention.

Visible area: Body area: unclear. Detail: The visible body area could not be identified reliably. Body-area confidence: 0.

Image quality and framing: Quality: poor. Location/framing: The image could not be analyzed reliably. Limitations: The image could not be analyzed reliably..

Visible marks: Count estimate: unknown. Relative size: unknown. Visible indicators: unclear.

Color and pattern: Color/pattern: The image could not be analyzed reliably. Pattern resemblance: unclear. Rationale: The image could not be analyzed reliably enough to describe visual pattern resemblance.

Shape, edges, and surface: Shape/distribution: The shape, size, and distribution of any visible marks could not be determined reliably. Edges/boundaries: The edges or boundaries of any visible marks could not be assessed reliably. Surface/surrounding area: The surface condition could not be assessed reliably from the image. The surrounding visible area could not be assessed reliably.

Non-diagnostic injury indicators: Possible types: unclear.

Safety and confidence: Concerning signs: none visible from image/context. Severity estimate: unknown. AI confidence: 0. Urgent care recommended: no.

Follow-up questions: Can you describe what happened?; When did this happen?; Are you in immediate danger?; Are you in severe pain or bleeding?

Documentation tags: unclear

Caution: This is not a medical diagnosis or legal conclusion.
